# LIGHT YOUR ENTIRE COMMUNITY

WITH THE BEST SOLAR LIGHT ON THE MARKET.

Sol solar lighting offers a practical, money-saving lighting alternative to help increase safety and security on your land. Avoid damaging the landscape with trenching, and preserve the night sky with fixtures that ensure no light or power is wasted. Maintain community sovereignty by losing ties to the grid and choosing sustainable solar lighting that won't be affected by brownouts or blackouts.

## LIGHT ANYTHING

- single light system
- 70' wide x 35' long

**20 watts<sup>†</sup>**

## LIGHT YOUR PARKING LOTS

- 130' pole spacing
- 60' wide (2 lights/lane)

**10 watts<sup>†</sup>**

## LIGHT YOUR PARKS & PATHS

- 130' pole spacing
- 12' wide pathway

**15 watts<sup>†</sup>**

## LIGHT YOUR STREETS

- 150' pole spacing
- 25' wide street

**25 watts<sup>†</sup>**

"Hopefully, this project will become a model for other Tribes and communities, showing that community-driven initiatives like this can happen."

— Robert H. Pell, Project Manager,  
Lummi Nation Planning Division

<sup>†</sup>Examples based on recommended light levels. Mounting height 25' (pathway mounting height 20').

**IES**

**Meets IES light levels**  
with a smaller system, reducing costs.

**10**

**10-year municipal-grade warranty\***  
with every light.

*\*5-year warranty on standard battery. Extended-life  
10-year battery upgrade available.*

**IoT**

**Monitor system health**  
with included remote monitoring.

# 3 REASONS TO CHOOSE THE EVERGEN

## MEET THE SMARTER **EVERGEN**<sup>®</sup> SOLAR LIGHTING SYSTEM.

### ACCURATE SIZING

Battery bank size relative  
to fixture output ensures a  
reliable system with four-  
plus days of autonomy.

**4+** days  
autonomy

### DARK-SKY CONTROLS

Illumination only when and  
where you need it with  
Dark-Sky Approved fixtures  
and scheduled dimming.

### EFFICIENT & AFFORDABLE

Highly optimized system  
that is sized smart, not  
large.

### REMOTE MONITORING

Lights that tell you  
when they need  
attention.

Custom paint finishes  
and fixture types  
available.

### WARMER LIGHT (3000K)

The EverGen meets  
required light levels while  
avoiding unnecessary  
health and  
environmental  
impacts.

**130**  
lumens/  
watt

EN 61547  
Emissions

# DON'T BE FOOLED BY TRICKS OF THE TRADE.

Some solar lighting companies may use tricks of the trade to sell you on a product. Unscheduled dimming, undersized systems, and motion sensing can compromise the light levels you expect, leaving you with less backup power and autonomy.

At Sol, we don't use cheap tricks. We use our expertise to give you a system that meets light levels, can be monitored remotely, and is built to last—with a 10-year warranty.
