

# UP<sup>®</sup> SERIES

ALL-IN-TWO SOLAR LIGHTS

## INDUSTRY-LEADING WARRANTY

The UP Series comes with a 10-Year municipal grade warranty on the complete solar system, battery included.

## REDUCED INSTALLATION TIME

Thanks to its plug & play design, it only takes 30 minutes to install a light, pole included. Less time spent on installation means lower project cost.

## MOTION SENSING CAPABILITY

Mindful of the inconvenience that too much light causes to wildlife and residents, the light flow can be reduced in the middle of the night. During this time, the motion sensor increases the level of light to allow users to travel safely.

## SMART LIGHTING MANAGEMENT

The UP features proprietary adaptive lighting algorithms that automatically adjust the light flow based on the amount of energy available in the battery to ensure uninterrupted lighting all night, every night.

## EXTREME WEATHER RESISTANT

UP is engineered to withstand up to Category 5 hurricanes and to work effectively in extremely cold or hot environments.

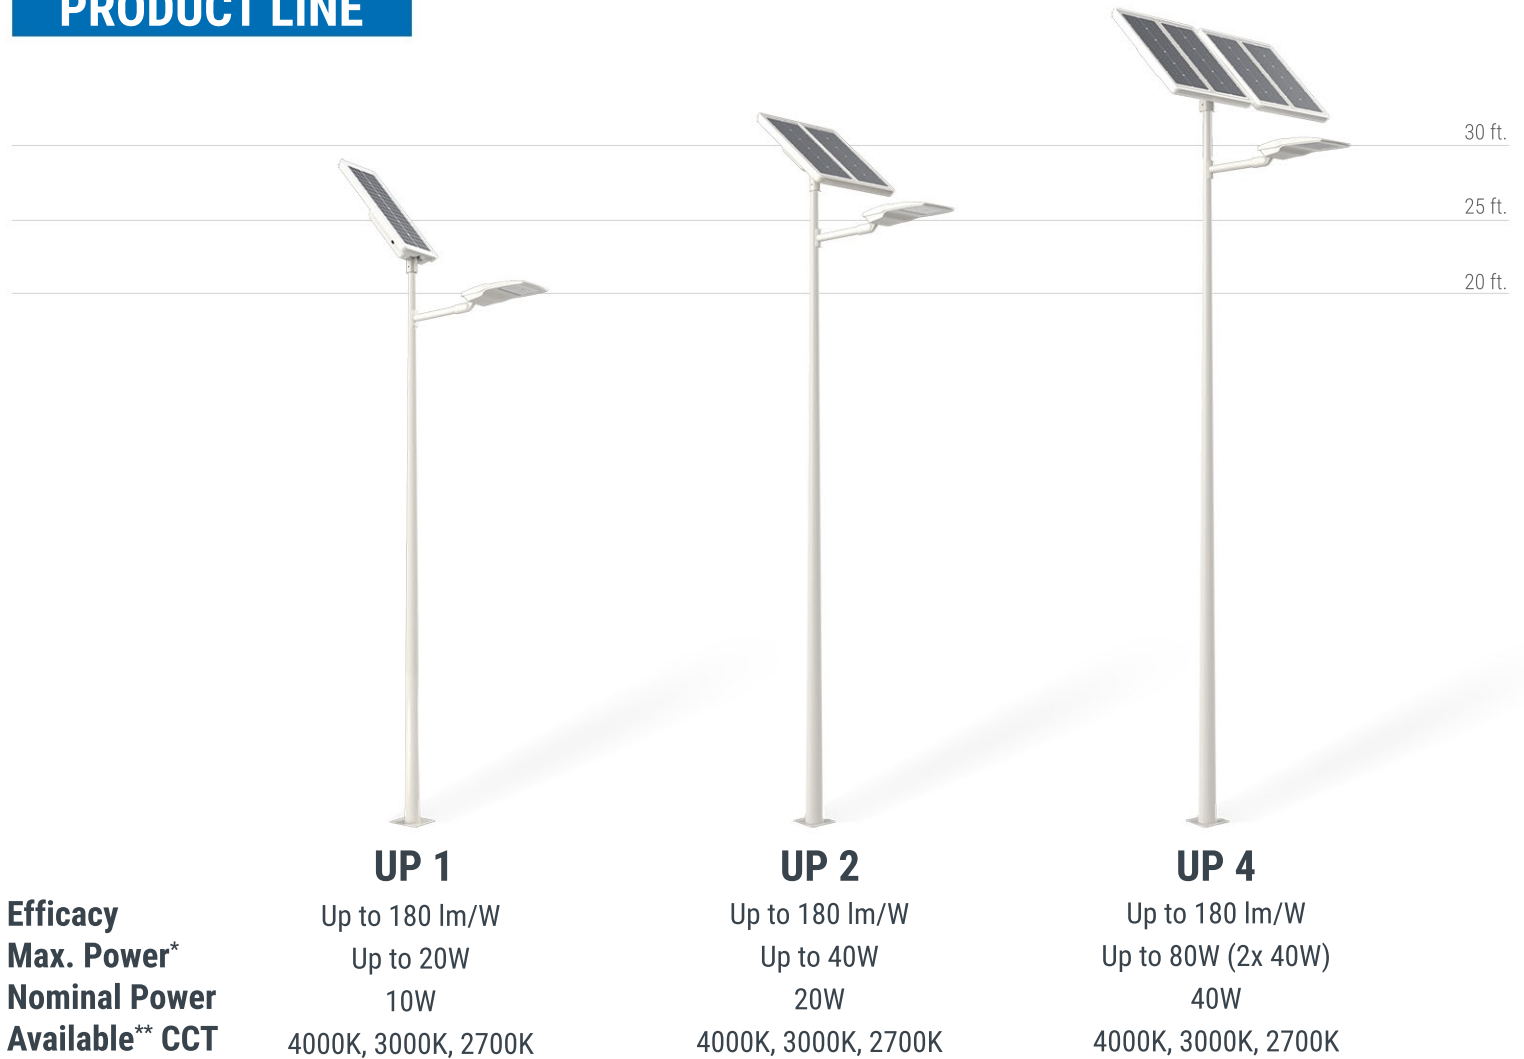

## PLUG & PLAY. INCREDIBLE RELIABILITY.

The UP<sup>®</sup> Series is a unique all-in-two solar light that delivers unrivaled performance in every environment. Equipped with a high-density NiMH battery, UP<sup>®</sup> requires **no scheduled maintenance for 10+ years**.

To provide flexibility for your projects, the UP<sup>®</sup> is compatible with many fixtures from Tier-1 US lighting manufacturers, already approved by Municipalities and DOTs around the country.

The UP<sup>®</sup> Series is ideal for **Pathways & Parks, Parking Lots, and Residential streets.**

## PRODUCT LINE

\* Maximum power is only available with motion sensor-based profiles.  
\*\* 2700K available upon request.
